

# Let's innovate Railway

## RailLab, for Railway operation

Developed since 2010 by Rail Concept, with a history of more than 200 projects in France and around the world, RailLab is one of the most efficient and ergonomic software in the field.

Its purpose is to :

- Design reliable and robust timetables
- Anticipate hazards in operational situations
- Ensure the relevance of new facilities
- Simulate new railway innovations

## They trust us

### SNCF Réseau

Capacity and robustness improvement  
ERTMS 2 Deployment

### Getlink / Eurotunnel

Timetable validation

### SNCF Innovation

Studies of autonomous train  
and energy savings

### Gustave Eiffel University

Association with RECIFE

## Development team at your service

You are integrated into the development process

Computer and railway expertise in perfect synergy

Reliability in development deadlines

Research projects with universities

Provision of licenses in partnerships

## Our iconic world studies
